

Neitronik 5GRS – the best technology available

Neitronik 5GRS is the best available technology of protection from electromagnetic radiation. For mobile and radio telephones, smartphones, tablets, microwave ovens, wi-fi routers.

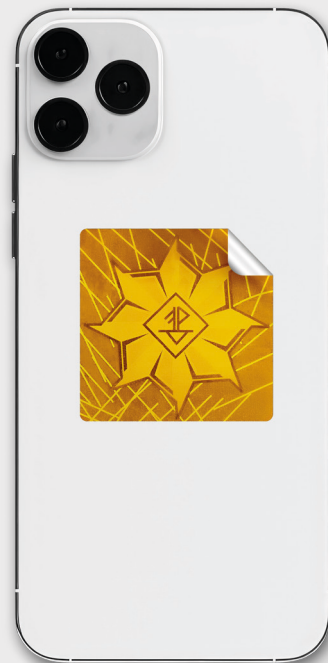

Warranty obligations

The Developer and Manufacturer guarantees successful operation of NEITRONIK for not less than 3 years, on condition of observance of operating rules. Device operational life is not less than 10 years since the beginning of operation. Storage time is not limited.

Supplied with:

1. NEITRONIK 5GRS device;
2. User instruction;
3. Installation manual.

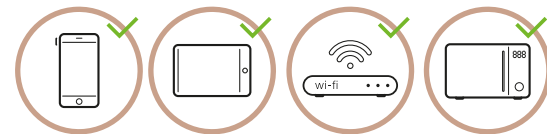

Attention! For the best results, follow the instruction.

Neitronik[®]

5GRS

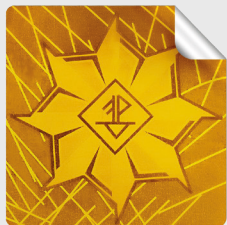

Protection from radiation №1

For a telephone, smartphone, tablet, wi-fi router and microwave oven.

User instruction

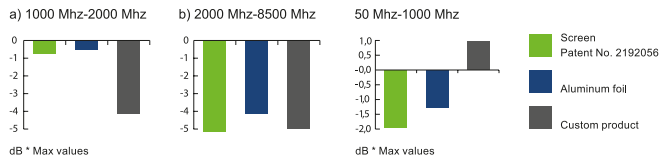

Before installation, please read the instructions. Carefully peel the edge of Neitronik, remove it from the protective packaging and adjust on the device immediately. Neitronik's adhesive basis provides its good grip on a smooth surface.

ATTENTION! In order to avoid the loss of Neitronik's protective properties, please avoid mechanical damage and refixturing to another device.

Proofs of Neitronik's efficiency (screen patent 2192056)

* Radio physical characteristics analysis

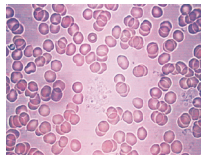

Weakening of a magnetic component of EMF Weakening of the electromagnetic field

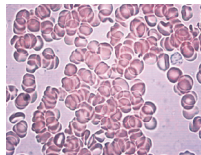

* Biological testing. Reinhold Voll diagnostics of CNS

No telephone	With telephone		Measurement points
	No Neitronik	With Neitronik	
40-50 units norm	70-90 units arousal	20-30 units depression	40-50 units norm

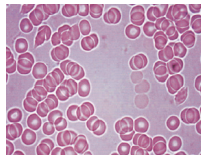

* Biological testing. Erythrocytes status test

Normal blood condition, no mobile phone

Blood after a 4-minute talk on the phone without protection

Blood after a 4-minute talk on the phone with Neitronik 5GRS

Installation manual

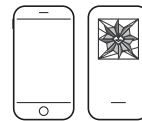

The product is intended for reduction of harmful electromagnetic effects of mobile and radio telephones, smartphones, tablets, notebooks, TVs, monitors, computers, portable radio stations, microwave ovens, wi-fi routers on people.

The main benefit of NEITRONIK in comparison with other protective devices is that, while working with the switched-on radiating device, NEITRONIK interacts only with its electromagnetic field. When functioning, NEITRONIK does not influence people, remaining absolutely safe for health. When the radiating device is switched off, NEITRONIK remains neutral.

Recommendations for use and service of the product.

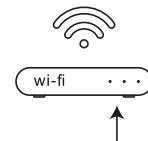

Normal work of NEITRONIK does not require any special care.

Telephone and smartphone

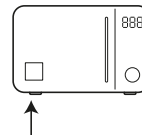

Fix Neitronik on the battery or back cover, it can be installed under a cover.

Wi-Fi router, notebook

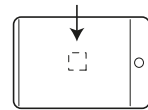

Fix Neitronik on the bottom in the center of the right part of a Wi-Fi router or a notebook, triangle pointing at the front panel.

Microwave oven

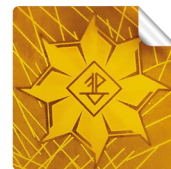

Fix Neitronik on the bottom left corner of the microwave oven door (from outside).

Tablet

Fix Neitronik in the center of the back panel of the tablet (additionally, fix MG-04M in the bottom left corner of the screen)

ATTENTION!

The triangle in the center of the hologram should point downwards (unless otherwise specified).
