

Neitronik MG-04M – the best technology available

Neitronik MG-04M is the best available technology of protection from electromagnetic radiation. For monitors, TVs, notebooks and tablets.

Warranty obligations

The Developer and Manufacturer guarantees successful operation of NEITRONIK for not less than 3 years, on condition of observance of operating rules. Device operational life is not less than 10 years since the beginning of operation. Storage time is not limited.

Supplied with:

1. NEITRONIK MG-04M device;
2. User instruction;
3. Installation manual.

Attention! For the best results, follow the instruction.

Neitronik[®]

MG-04M

Protection from radiation №1

For a monitor, notebook, tablet and TV.

www.neitronikus.com

User instruction

Before installation, please read the instructions. Remove Neitronik from the protective packaging and adjust on the device immediately.

Neitronik's adhesive basis provides its good grip on a smooth surface.

ATTENTION! In order to avoid the loss of Neitronik's protective properties, please avoid mechanical damage and refixturing to another device.

Proofs of Neitronik's efficiency (screen patent 2192056)

* Radio physical characteristics analysis

Weakening of a magnetic component of EMF Weakening of the electromagnetic field

* Biological testing. Reinhold Voll diagnostics of CNS

No monitor	With monitor			Measurement points
No Neitronik	With Neitronik			
40-50 units norm	70-90 units arousal	20-30 units depression	40-50 units norm	

* Biological testing. Erythrocytes status test

Normal blood condition, without monitor (TV)

Blood after 4 minutes of exploitation of a monitor (TV)

Blood after a 4-minute work at the monitor with Neitronik MG-04M

Installation manual

The product is intended for reduction of harmful electromagnetic effects of mobile and radio telephones, smartphones, tablets, notebooks, TVs, monitors, computers, portable radio stations, microwave ovens, wi-fi routers on people.

The main benefit of NEITRONIK in comparison with other protective devices is that, while working with the switched-on radiating device, NEITRONIK interacts only with its electromagnetic field. When functioning, NEITRONIK does not influence people, remaining absolutely safe for health. When the radiating device is switched off, NEITRONIK remains neutral.

[Recommendations for use and service of the product.](#)

Normal work of NEITRONIK does not require any special care.

Monitor

Fix Neitronik under the lower left corner of the screen.

TV

Fix Neitronik under the lower left corner of the screen.

Notebook

Fix Neitronik under the lower left corner of the screen (additionally, 5GRS on a bottom in the center of the right part, the triangle pointing at you).

Tablet

Fix Neitronik under the lower left corner of the screen (additionally, 5GRS in the center of the back panel).
